# ALOPRA STUDIO

[www.alopra.com](http://www.alopra.com)

Aloptra is a company formed by artists, animators, advertisers, filmmakers and designers. We don't just have a nice office with creative people, beer, paint splatters on the walls and cool action figures everywhere ... ok, ok, we have these things! However, we know that no work happens without organization, management and responsibility. We don't limit our creativity, but we have procedures to organize it. We've learned this from more than 100 years of producing adverts, commercials, entertainment and content, as well as both creating and producing our own IPs. From creating the simplest of illustrations to developing characters and even designing complex 2D and 3D animations, we've done this so many times and yet we always have the energy and the willingness to see each project as a new challenge. By the way, you read it right, "more than 100 years". Since we were established more than 15 years ago we have accumulated the experience of our unique team members. We believe in the power of ideas and that connected minds catalyse change.

## **Animation Services: Creation, Development and Production**

We make your project gain life! We understand the whole animation process and at the same time we have a detailed knowledge of each of its parts. We offer services to both the advertising and entertainment industries. Because of our experience creating our own IPs we have the ability to co-create, manage and work on your projects. Since we develop our own IPs we fully understand the meaning that your project has to you.

## Hired 2 Die

here is a thin line between our perception of reality and reality itself. In a strange twist, the perception of ordinary human beings is corrupting reality, creating beings known as Distortions. These Distortions commonly appear in places where the human psyche is at its breaking point, and the stress generated by this phenomenon manifests as strange objects and dangerous creatures. A long-dated, mysterious company named Intersection claims to have the solution. By selecting a few individuals capable of perceiving and dealing with Distortions, they can keep the threat to a minimum.

## Paper's Grade, Please!

How smart do you think you are? Hopefully you have enough brain power to grade the answers from your students! Kids say the funniest things and it is up to you to catch what is right and what is wrong. Give students A's or F's based on their answers. Careful, not all of them are geniuses so it is up to you to catch the wrong answers! Students will try to be funny and outwit you with your answers. It may be funny, but it will still be wrong! Fail that kid! We don't appreciate their attempts to be comedians. Make sure they know math, english, or geography. Some of the answers might even have you feeling like a smart, brainy professor. Help these kids out and prep them for college - you are on your teaching journey!

## Swipow

The game takes place in a house in the Brazilian Amazon Region, where energy generation is needed. It is a portrait of a typical house in the Amazon region of a small rural producer. The visual representation is very simple, with semi-realistic aspects. The game has a unique setting, characteristic of hyper casual games, showing the house and the Biodigester in a playful way. For future effects, new scenarios are proposed that make reference to the use of the Biodigester in territories of other continents. The game is made up of continuous progression phases where different objects are dropped to feed the Biodigester, which will generate gas for energy.

**Genres:** Hyper Casual. The choice of this genre by the technical team was based on the future possibilities for the gameplay and the launch of new phases to be expandable, without interfering with the project's concept.

**Platforms:** Android and IOS versions

**Game Release Date:** 2020
